

Senior Product Designer

Evolve - Denver, Colorado // February 2022 - August 2025

- Led end-to-end design & shipped high-impact tools like Inbox, self-serve cancellations, and booking rule management, streamlining communication and complex workflows. Results included a 93% faster owner-guest response time, reduced support demand, and a ~1.9-point NPS lift around communication.
- Owned the holistic redesign of the Owner Account web and app experience, defining a new information architecture and user flow. Decreased recurring bug cases and lowered support calls.
- Influenced the product design practice by partnering with the Design System team, contributing to the development of a scalable component library that reduced design-to-development time and improved product consistency across 3 core products.
- Elevated the team's craft through mentorship, leading a series of UX writing workshops that empowered designers to own a more comprehensive part of the user experience.
- Leveraged AI tools in day-to-day workflows and product design to build forward-thinking, AI-powered solutions for users.

Senior Product Designer

Notion, A Comcast Company - Denver, Colorado // February 2021 - February 2022

- Conceptualizing and designing new features for the professional monitoring service for the DIY smart home monitoring native mobile app. Redesigning legacy features with a strong focus on delivering designs that meet AA accessibility standards.
- Leading the Design System 2.0 implementation with specific focus on new components, patterns, and refining color usage guidelines.

Senior Digital Product Designer

Transamerica - Denver, Colorado // September 2018 - February 2021

- One of three designers responsible for merging two mobile Participant-facing apps into one in six months. Redesigned legacy features and designed new features with a focus on accessibility, redefined information architecture, and created style guides.
- Identified experience gaps and focused on improving user retention for a data-heavy, financial management platform, Workplace Experience, used by large and mega-market financial professionals.
- Became lead designer on the participant-facing platform designed for all Transamerica plan participants. Developed a UX theme based workshop and helped spearhead design strategy during crucial planning phases with stakeholders.

UI/UX Designer

General Motors - Detroit, Michigan // July 2016 - August 2018

- A lead on UI and UX redesign of dealership sales assistant phone and tablet application.
- Lead on developing new pattern style guide for use on the Dealer Sales Assistant product and across the team's entire portfolio of mobile applications.
- Conceptualized, created, and redesigned for MyBrand applications such as MyChevrolet.
- Helped lead experiential design and signage at the Innovation Dealership Lab located in the Atlanta - Georgia IT Innovation Center. Defined flow of space and content displayed for the tour taken by CEO Mary Barra and CIO Randall Mott.

UI/UX Designer

Parishsoft - Ann Arbor, Michigan // November 2012 - April 2016

- Lead on new flagship community portal product, a key space for users for financial and personal information. Applied Bootstrap framework to application.
- Designed tuition invoicing system, core tool in product suite. 1000+ users, 34 organizations.
- Increased user adoption of education management software.
